DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18 and 22 - 47, drawn to a method of treating benign prostatic hypertrophy transdermally with terazosin, classified in class 424, subclass 449.
 - II. Claims 19 – 21 and 48, drawn to a method of treating side effects transdermally, classified in class 424, subclass 449.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to completely different mechanisms and uses for the device of the invention. Group I is drawn to a treatment method for benign prostatic hypertrophy, while group II is drawn to the treatment of unspecified side effects.
3. This application contains claims directed to the following patentably distinct species of the claimed invention: in claims 35 – 38, 41 and 46,

- the backing layer material:
 - a. a flexible material
 - b. an inflexible material
 - c. an aluminum foil
- polymeric matrix:
 - a. rubber

Art Unit: 1615

- b. a rubber like synthetic homo-, co-, or block polymer
 - c. a urethane
 - d. silicone
 - e. copolymer of 2-ethylhexyl acrylate
 - f. vinyl acetate and acrylic acid
1. softening agent
- a. dodecanol
 - b. undecanol
 - c. octanol
 - d. glycol and glycanol
 - e. medium chain triglyceride of the caprylic/capric acids of coconut oil

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 25 and 28 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Micah-Paul Young whose telephone number is 703-308-7005. The examiner can normally be reached on M-F 7:30am-4:30pm.
